

# Under Counter Water Dispenser with Electric Faucet. Hot water (H-689) / Hot & Ice water (HC-689)

New design of under counter dispenser with electric faucet interface of temperature indication, re-boiling, power saving setting, continuous water supply and hot water protect function- locking. This new innovation brings you safe, fashion and durable water system.

This water dispenser is made of open structure design with low pressure. It complies with current world standard. Water molecule expanding in the hot water tank and steam discharging from faucet all are normal conditions. It is different from traditional dispenser which has water pollution risk by discharging water from pipes.

The faucet has digital readout that brings you easy life. It is created by high technology which is able to prevent tubes from getting heated by hot water

### Function:

#### CONTINUOUS WATER SUPPLY

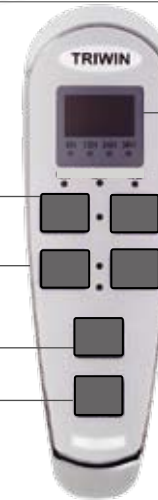

Just one touch to the bottom "Continuous Water Supply", water will continuously flow for big volume use.

#### HOT WATER PROTECT-LOCKING AUTOMATICALLY

Hot water locking function will present children and elders from accidents of water splash and scald. The auto power cut-off system will start when water runs out inside the tank. It ensures safety for using.

Hot Water

Cold / Ice water

#### TEMPERATURE INDICATOR

LED readout helps you to clearly know current water temperature in tank under counter.

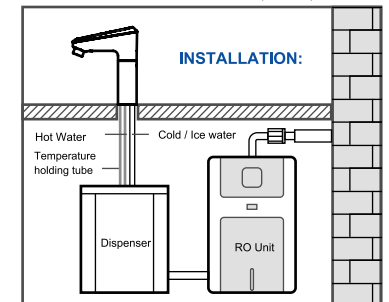

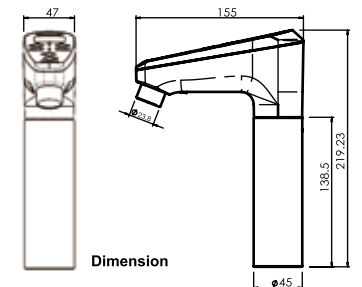

#### POWER SAVING- TIMER OFF SETTING

Multi modes of operation including power setup and sleep mode. This smart design will save power and time. And of course, your money will be saved as a result.

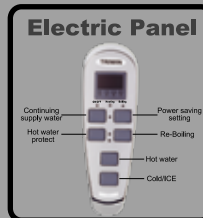

#### RE-BOILING FUNCTION

Push the "Re-boiling" bottom and the system will start to boil water again immediately with the indicator light. It will stop operating as soon as the water temperature reaches 100 degrees

Model No.	H-689	HC-689
Faucet	Electric Control	
Hot Water Watt	1000W	
Ice Water Watt	-	210W
Hot Water Capacity	4L	
Ice Water Capacity	-	2L
Dimension	W230xD250xH360mm	W300xD380xH360mm
Safety	Overload breaker fuse	
Voltage	110V or 220V	

Get instant hot or ice water anytime you need!!

Founded in 1984, Triwin fulfills the need for top quality products and equipment in the water treatment industry worldwide. Our main products are residential RO systems, commercial & industrial RO systems, pure water systems and all water treatment components. Triwin is not only a water-treatment parts supplier, but also a designer and programmer of medium systems based on customer needs. Customer service is our top priority.
